

Karthi D — Developer Profile

This profile was generated using the available conversation context and known technical interests, learning paths, and professional experience shared previously.

Professional Summary

Backend-focused software developer with experience in Python and Django development, actively expanding expertise into AWS, DevOps, AI/ML, Angular, MongoDB, and scalable backend systems. Experienced working in production environments involving Django and Tornado architectures, API development, authentication systems, RAG pipelines, and deployment workflows.

Core Skills & Interests

- Python Development
- Django Backend Development
- JWT Authentication
- REST API Development
- MongoDB
- AWS Fundamentals
- DevOps Learning Path
- AI & Machine Learning Fundamentals
- RAG Systems with ChromaDB
- FastAPI
- Angular (Learning)
- LeetCode / Problem Solving
- Deployment & Infrastructure Concepts

Professional Experience

Working professional with backend development experience using Django. Worked in systems involving Django and Tornado integration layers. Handled API workflows involving XML-to-JSON transformation pipelines. Experience integrating authentication systems and backend business logic. Exploring scalable AI integrations and RAG-based architectures.

Projects & Technical Exploration

Project / Area	Description
Django ToDo Application	Implemented user creation and JWT authentication workflows.
RAG Portfolio System	Worked on architecture using ChromaDB and FastAPI for retrieval-based AI systems.
Voice Assistant Exploration	Interested in building personalized AI voice assistants.
Project Planning AI	Designing AI-based sprint, milestone, and execution planning systems.

Current Learning Focus

- Advanced AWS concepts
- DevOps workflows and deployment systems
- AI/ML foundations and practical implementation
- Angular frontend development
- Vector databases and AI architecture

Work Style & Interests

- Backend engineering focused
- Interested in scalable architecture and automation
- Enjoys hands-on technical experimentation
- Consistent learner across cloud, AI, and infrastructure domains
- Balances work with regular gym routine and evening study schedule
